

TAN LI TUNG

Kuala Lumpur, Malaysia • (60)1155861927 • tanlitung388@gmail.com • linkedin.com/in/tanlitung • tanlitung.github.io

AI Engineer and technology leader with 3+ years of experience delivering enterprise-scale Generative AI, digital transformation, and banking technology solutions. Proven experience leading cross-functional teams, managing vendors, and owning end-to-end AI solution delivery, including RAG chatbots, LLM evaluation, AI governance, and enterprise system integration. Skilled in translating business requirements into scalable technical solutions while collaborating with business, risk, compliance, and technology stakeholders. Passionate about leveraging emerging AI technologies to enhance customer experience, operational efficiency, and business outcomes.

Generative AI | Large Language Models (LLM) | Retrieval-Augmented Generation (RAG) | Prompt Engineering | Azure AI Foundry | Azure AI Search | Azure OpenAI | Copilot Studio | Python | SQL | Microsoft Dynamics 365 | SSIS | Team Leadership | Project Management | Stakeholder & Vendor Management | AI Governance

KEY ACHIEVEMENTS

1. Led an 8-member cross-functional team to deliver enterprise GenAI chatbot using Azure AI technologies.
2. Reduced annual production defects by 57% by resolving over 800 defects and improving delivery quality.
3. Successfully migrated 200M+ records to Microsoft Dataverse ahead of schedule.
4. Selected for a regional secondment to Indonesia as Co-Project Manager for a GenAI transformation initiative.
5. Vice Chancellor Award recipient and CIMB ASEAN Scholar.

PROFESSIONAL EXPERIENCES

CIMB Bank Berhad, Kuala Lumpur

04 / 2026 – Current | Assistant Manager - Live Chat & GenAI Chatbot System Analyst and Developer

(Promoted from Executive Officer based on AI delivery leadership and project ownership)

- Led and mentored an 8-member cross-functional team comprising solution architects, developers, analysts, and vendors to deliver CIMB's enterprise Generative AI chatbot in Microsoft's platform.
- Owned end-to-end AI solution delivery including business requirement analysis, solution architecture, vendor management, security review, governance approval, testing strategy, production deployment, and post-production monitoring.
- Designed and implemented Python-based enterprise GenAI RAG solution architecture including knowledge ingestion pipelines, chunking strategies, embedding optimization (supporting 6,000+ webpages and PDF documents), prompt engineering, LLM evaluation, and chatbot performance monitoring.
- Collaborated with business, customer experience, risk, compliance, and technology stakeholders to ensure responsible AI adoption aligned with banking regulatory requirements.

12 / 2023 – 03 / 2026 | Executive Officer - Batch Lead and Secondment to CIMB Niaga (Indonesia)

- Spearheaded the design and collaborative development of 26 customer and account batch interfaces with vendor, ensuring SQL script and SSIS package optimization to guarantee timely completion of batch within the critical 8-hour window.
- Resolved over 800 defects and reduced annual defect volume by 57% through proactive issue analysis and process improvements.
- Selected for regional secondment to CIMB Niaga Indonesia as Co-Project Manager and AI Engineer for GenAI transformation initiative involving 4 customer service and relationship management use cases.
- Led AI solution evaluation including comparison of Google Agent Builder and custom-developed RAG architecture (using LangChain), defining implementation approach and technical requirements.

10 / 2022 – 11 / 2023 | *The Complete Banker Digital (TCBD)*

- Configured Azure DevOps for the project team as a project progress tracking and test management tool.
- Led the migration of over 200 million records to Microsoft Dataverse, delivering ahead of schedule through comprehensive testing and multiple successful dry runs.

ViTrox Corporation Berhad, Penang

01 / 2021 – 08 / 2021 | *Research and Development Intern*

- Developed image similarity algorithms and X-ray image quality metrics for luminance, contrast, sharpness, and noise evaluation.

SELECTED PROJECTS AND PUBLICATIONS

1. [Machine Learning] Smart Drunk Detector – Developed a CNN-based alcohol detection prototype achieving 98.17% accuracy on the test dataset.
2. Remote Patient Monitoring System – Published in [IEEE conference](#).
3. [Deep Learning] Spatio-temporal Generative Adversarial Deep Neural Network for Unsupervised Learning of fMRI Brain Network Activity – Published in [ISIE 2022](#) p.g. 172.

EDUCATION BACKGROUND

Bachelor's Degree

Universiti Teknologi PETRONAS (UTP)

Electrical and Electronics Engineering

09 / 2018 – 09 / 2022

- CGPA: 3.96, Vice Chancellor Award Recipient and Consecutive Dean's List holder.
- CIMB ASEAN Scholar.
- Participated in a summer school program at Hamm-Lippstadt University of Applied Sciences, Germany.

Foundation

Universiti Teknologi PETRONAS (UTP)

Electrical and Electronics Engineering

07 / 2017 – 07 / 2018

- CGPA: 3.96, Consecutive Dean's List Holder throughout foundation studies.
- Best Student Award for Electrical and Electronics Engineering.

CLUBS, SOCIETIES AND VOLUNTEERING EXPERIENCES

1. Vice Chair IEEE UTP Student Branch - Led a committee of 10 members to organize 5+ international technical workshops with over 500 participants.
2. Secretary General, Student Representative Council - Improved council operational efficiency by 20% through digital workflow automation using Microsoft Teams, Power Automate, and SharePoint.
3. Project Manager, WebX UTP Online Web Development Course - Led a team of 20 students to deliver a free online web development course for 150+ participants with 100% positive feedback.

AWARDS AND RECOGNITIONS

1. Champion | Invent for The Planet (2022) | International Hackathon
2. First Runner Up | i-UM Disrupt Hackathon (2020) | National
